About Explore

- **Soft-Explore** is an integrated technology framework that automates the entire end-to-end management of education and its related information.
- It is a repository for data collection, processing, analyzing and reporting of educational information including schools, students, teachers and staff.

To improve capacities in data processing, storage, analysis and supply in order that educational planners, administrators and managers can have reliable and timely data and information.

To co-ordinate dispersed efforts in the acquisition, processing, storage, analysis, and dissemination of educational management information.

To change the school management in the areas of leadership, decision making, workload, human resource management, communication, responsibility, and planning.

Objective of Soft Explore

Student Management System

A **student management system** is a management system for education establishments to manage student data.

Student Management systems provide capabilities for registering students in courses, documenting grading, transcripts, results of student tests and other assessment scores, building student schedules, tracking student attendance, and managing many other student-related data needs in a school.

Staff Management System

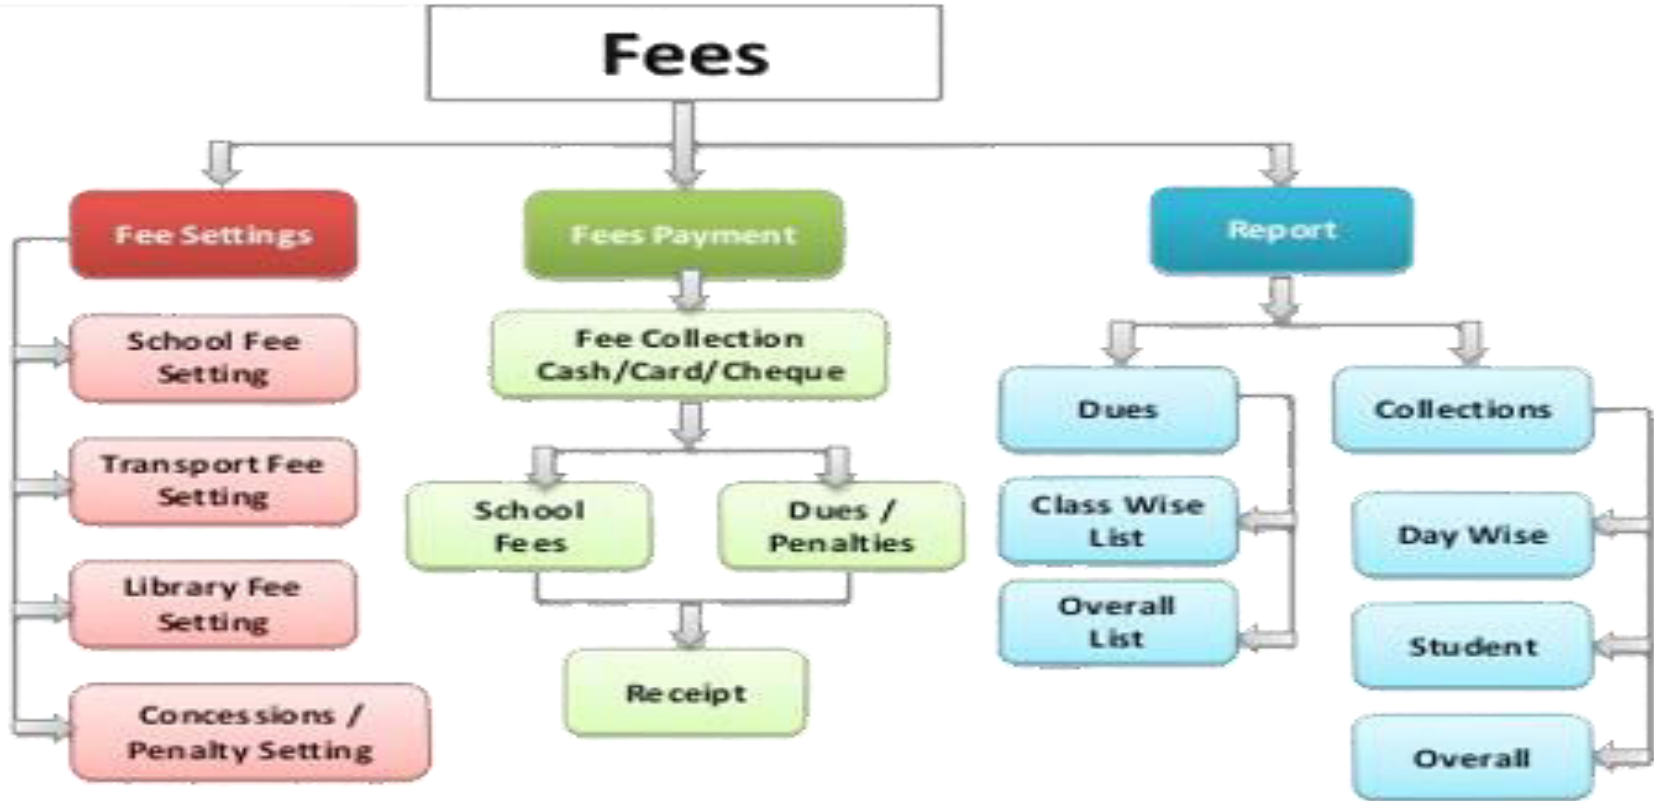

Staff Management System provides wide-range of functionality to deal with the school's employees.

Soft-Explore enables to store detailed information about Staff like Photos, Qualification, Experience, Reference, Salary, Address, to manage staff attendance records, payroll, leave apply/details, etc.

Fees Management System

Soft-Explore helps in managing the operation of fees collection and fee receipt generation easily and quickly. Fees Management is the most important module that will help an institution to maintain a financial record of an institution. Fees Management is a kind of module specially designed to give a precise idea to parents regarding the fee structure of the institution.

Accounting Management System

Accounting Management enables effective management of a school, college or institute. All Types of accounting transactions can be tracked by using this module and it reflects in books of accounts automatically. Accounting module keeps track of various expenses made by the school or institution. It also has the facility to generate and print vouchers, which are an essential document for accounts.
